Backer

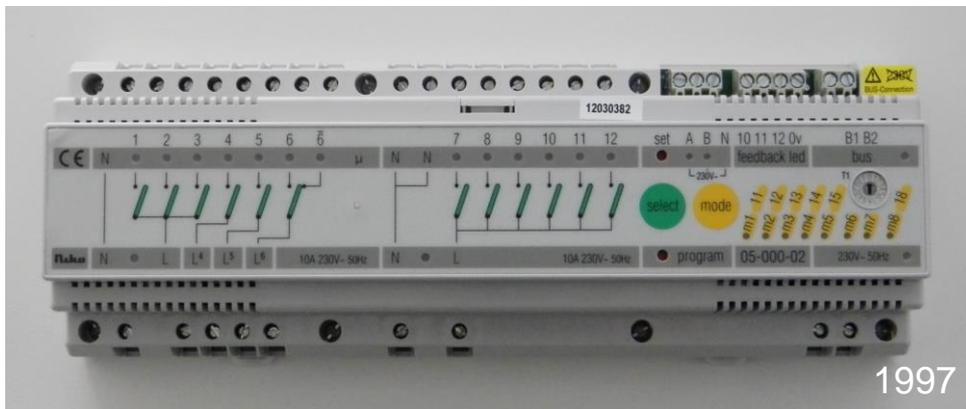

Design has been part of Niko's DNA

Family-owned since 1919

Innovation has been part of Niko's DNA

Innovation through Incubation

In 2006, Niko Group established fifthplay, an incubator creating a Cloud based software platform with a focus on enabling smart homes, buildings and related business models

International Expansion

Through the acquisition of Servodan (DK) in 2008, and Zublin (CH) in 2014, Niko obtained a Europe wide position in sensor devices

Niko Group today

active in

12

countries

more than

600

employees

53

net promotor score

in touch with

± 200 000

professionals

Net Sales (2016)

€ 162M

more than

Technology trends affecting us and our business

Everything Connected

- Every device talking to the Cloud
- Devices connected through the Cloud
- IoT evolutions

Data Science

- AI, machine learning, deep learning
- Learning, cognitive appliances
- Personal assistants

Digital Transformation

- Non physical products
- Cloud2cloud
- Security and Privacy (GDPR compliancy)

'Appification'

- Mobile as master control
- App2app
- Small and lean GUIs

Disruptive business models

- Hardware to services
- Go-to-market channel disruption
- 'Cloudy' business cases

IOT's impressive numbers

Size

14 billion devices in 2014
50 billion connected devices by 2020

Spread

2 connected devices per person in 2014
5 connected devices per person in 2020

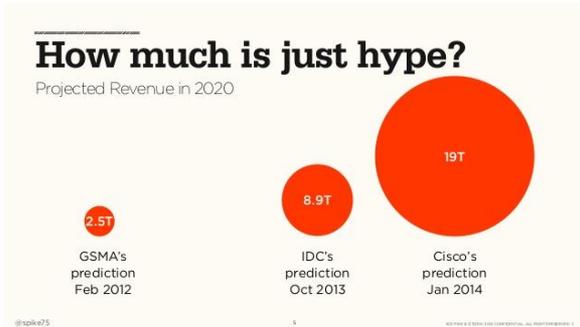

Growth

CAGR 15..20%

Opportunity

250 Billion IoT spend (devices + services) by 2020

Hype

Marry the 'old' and the 'new'

3 Horizons Model applied to the Smart Home sector

Consumer standpoint of view

About
NIKO

NIKO
About

Our
Challenges

Challenges
Our

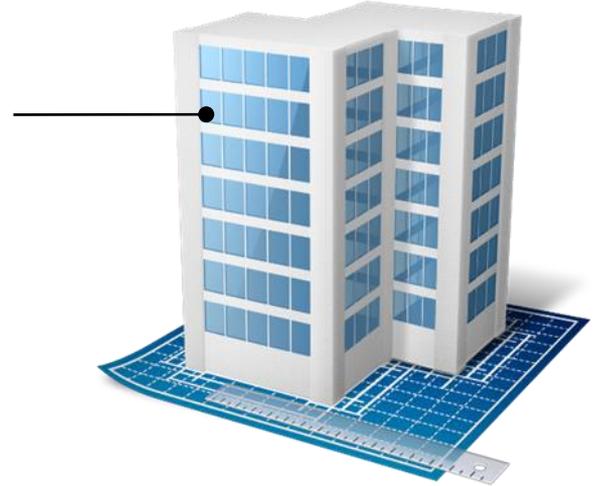

A vision of
the future

the future
A vision of

Opportunity

Opportunity

Comfort and energy efficiency by lighting control in commercial buildings

Detector

Manual control

Light scenes

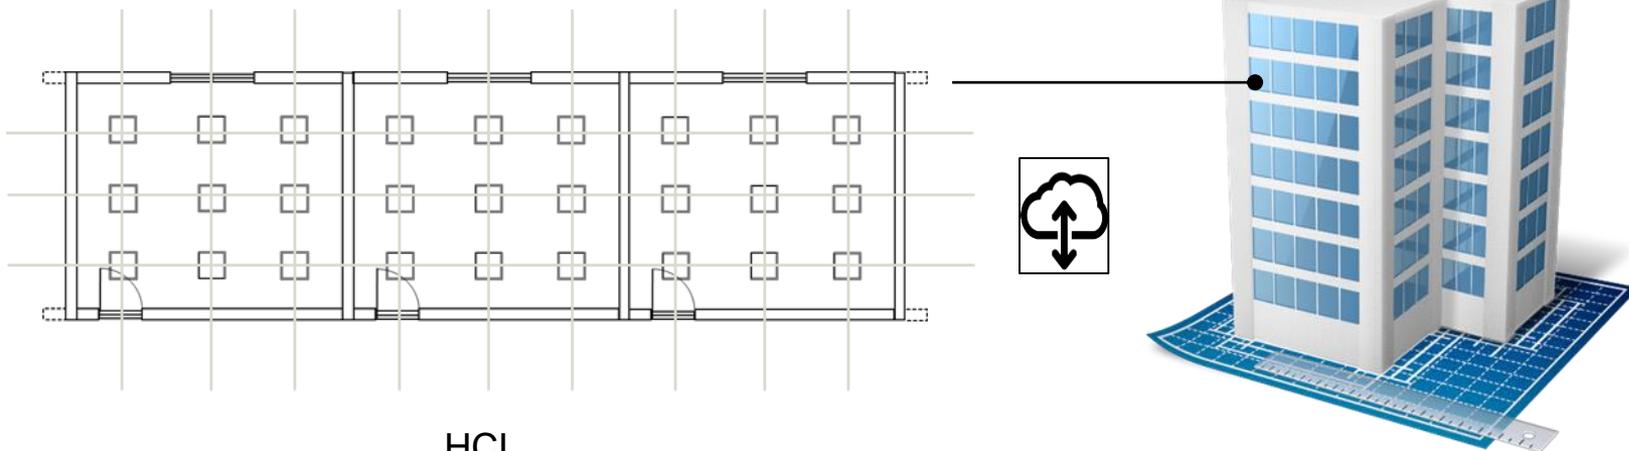

APP control

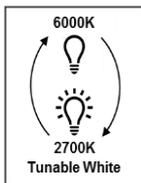

IoT in Lighting Control

More data, thus better control, more comfort and higher efficiency

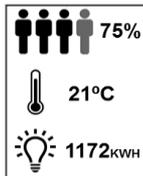

Personalized control

HCL

More comfort and efficiency

More data – and savings

IoT in Lighting Control Facilitating Commissioning

A new way to configure sensors

The Niko Sensor Tool app provides...

- Simplicity and user friendliness

All you need...

- The app Niko Sensor Tool
- IR-dongle

niko SERVODAN

What IoT brings

More value to the end-user

Ease of use

New functional possibilities

Higher efficiency in installation

Increased maintenance economy

What IoT **also** brings

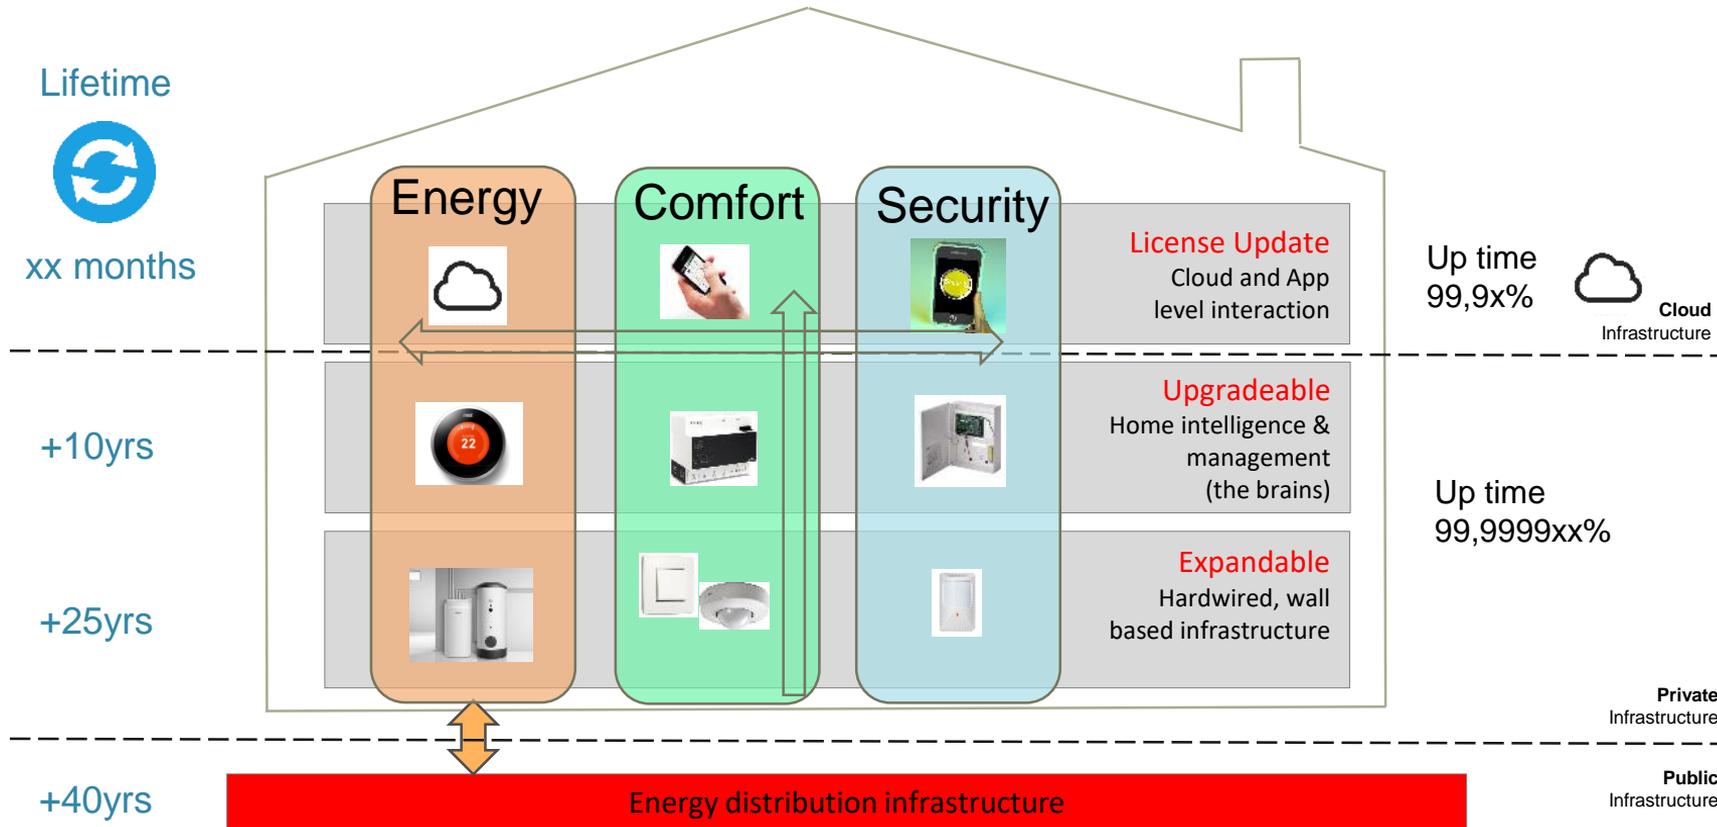

Complexity

Too many Apps

Functional islands

Tech stress

The opportunities for companies in our sector

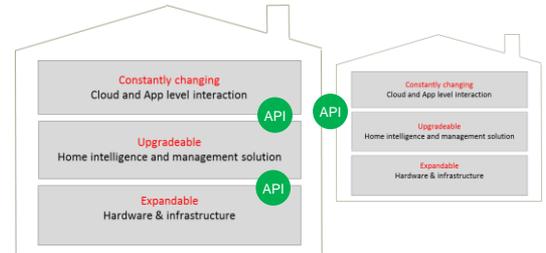

Integration, Collaboration, Interfacing and Translation

Assuming there is
no winner,
collaboration is
the only option

Different standards will
always be a fact of life

Operability & Interoperability
is our duty

A last word on Lighting and Lighting Control

- Lighting has lead the way on energy saving and efficiency
- It can lead the way in the IoT era:
 - As the most common comfort function in our private and professional life, it calls to everyone
 - Personalization and Human Centric Lighting are just at the beginning of exploitation
 - We have research, industry collaboration bodies, and government support available
